About EMA:

*EnergyWise is a
monthly e-Newsletter
produced by the
Energy Management
Association (EMA), a
subsidiary of the
AABC Commissioning
Group (ACG).*

*EMA is a new and
innovative
association*

If you couldn't make it to CxEnergy and would like to catch the presentations, or if you did and would like to circle back on any you missed, you're in luck. This week all 32 of the sessions were released on CxEnergy's YouTube channel.

The video catalog contains topics ranging from the new ASHRAE commercial building audit standards (pictured above), to energy management case studies in exotic locales such as Caesars Palace to tips on benchmarking from DOE. And, of course, a variety of presentations on various commissioning topics in settings from health care to city-wide ordinances.

dedicated to advancing the quality of energy management services for the benefit of the building owner.

EMA provides comprehensive training, education and certification for energy management professionals, building owners, and other industry professionals.

Not too Late to Register for EMA co-presented Webinar on Sustainability Issues in the Education Sector; Tomorrow July 19, 1:00 PM Eastern

EMA is co-presenting a free webinar that provides essential information to education-based administrators, architects and engineering staff, and energy services providers on developing a sustainability strategy and how and where to find resources to overcome these challenges. It will be conducted Thursday, July 19, 2018. The webinar begins with a discussion of the scope of sustainability-related measures, examines the role of technologies such as the IoT and provides tips on how to find funding and resources.

Seven Problems that Retro-Commissioning Can Identify with IoT Smart Building Technology

Via Senseware, Commercial buildings are subject to operational, functional, and occupant changes that put a strain on the mechanical, electrical, and control systems which can lead to subpar building performance. This article details how IoT Smart Building Technology and RCx can improve performance. [Article](#)

EPA Unveils New Waste and Materials Tracking Feature in Energy Star Portfolio Manager

Benchmarking and tracking tool allows building managers to track energy, water, greenhouse gas emissions and waste. Energy Star Portfolio Manager already is used to measure energy, water and greenhouse gas metrics in more than 450,000 U.S. buildings, representing over 40 percent of U.S. commercial space. GSA Releases Study on Impact of High Performance Buildings in Federal Portfolio

ORGANIZATIONS & EVENTS

Let's Meet up at the Energy Exchange in Cleveland, OH August 21-23!

The study looks at 100 GSA high-performance buildings compared to 100 GSA legacy stock buildings, looking at actual performance data in five key metrics over three years. ([Read Article/Download Report](#))

Tell Your Congressional Delegation to Support Funding for Vital Energy Efficiency Programs at DOE

Our friends at the Alliance to Save Energy have posted an online letter to communicate with your congressional delegation about support for the Senate version of the DOE funding bill. EMPs and CxAs should note that the legislation supports vital programs such as the Better Buildings Workforce that recognizes the certifications. The Senate bill contains a modest one percent increase; the House version a ten percent reduction, which could cause significant programmatic cuts. [Link](#)

EMA, ACG and AABC are teaming up to exhibit at the DOE Energy Exchange and Better Buildings Summit in Cleveland, Ohio August 21-23. We will be at Booth 640 and, once again, are expecting to have members of our groups on hand to assist in staffing our exhibit. To learn more about the event visit [The Energy Exchange website](#).
